A-level PSYCHOLOGY

Paper 2 Psychology in context

Wednesday 21 May 2025

Morning

Time allowed: 2 hours

Materials

For this paper you may use:

- a calculator.

Instructions

- Use black ink or black ball-point pen.
- Fill in the boxes at the top of this page.
- Answer **all** questions. You must answer the questions in the spaces provided. Do **not** write outside the box around each page or on blank pages.
- If you need extra space for your answer(s), use the lined pages at the end of this book. Write the question number against your answer(s).
- Do all rough work in this book. Cross through any work you do not want to be marked.

Information

- The marks for questions are shown in brackets.
- The maximum mark for this paper is 96.
- Questions should be answered in continuous prose. You will be assessed on your ability to:
 - use good English
 - organise information clearly
 - use specialist vocabulary where appropriate.

Section A**Approaches in psychology**

Answer **all** questions in this section.

0	1
---	---

Describe how Skinner investigated the effect of reinforcement on behaviour.

[4 marks]

Extra space

0 2

Outline how evolution might influence behaviour. Give an example from a topic in psychology.

[4 marks]

Section B**Biopsychology**

Answer **all** questions in this section.

0 4

Name **one** type of neuron and briefly explain its function.

[2 marks]

0 5

Using an example of a hormone, outline the function of the endocrine system.

[4 marks]

Extra space

0 6

Explain the process of synaptic transmission. Refer to excitation in your answer.

Section C**Research methods**

Answer **all** questions in this section.

Academic journals suggest conflicting findings about the effectiveness of online learning. A researcher designed an experiment to measure the effectiveness of online learning compared with face-to-face learning.

The researcher placed an advert in an online forum asking for student participants for a memory experiment.

30 university students contacted the researcher and they were divided equally into two groups. Both groups learned the same topic.

Group 1 had 3 hours of online learning.

Group 2 had 3 hours of face-to-face learning.

At the end of the session, each participant completed a multiple-choice test scored out of 20 to measure how much they had learned about the topic.

0	9
---	---

The researcher chose to use a non-directional hypothesis for this study.

Explain why a non-directional hypothesis is appropriate in this case.

[2 marks]

1	0
---	---

Write an appropriate hypothesis for this study.

[3 marks]

Turn over ►

Only **one** answer for each multiple-choice question is allowed.

For each question completely fill in the circle alongside the appropriate answer.

CORRECT METHOD

WRONG METHODS

If you want to change your answer you must cross out your original answer as shown. 

If you wish to return to an answer previously crossed out, ring the answer you now wish to select as shown. 

1 1 Which **one** of the following best describes the sampling method used in this study?

Shade **one** box only.

[1 mark]

A Opportunity

☐

B Random

☐

C Systematic

☐

D Volunteer

☐

1 2

Evaluate the sampling method the researcher used in this study.

The results of the study are given in the table below.

Table 1 Median scores and ranges from the multiple-choice test for the two groups

	Group 1 (online)	Group 2 (face-to-face)
Median	18	2
Range	5	10

1 3

What do the median **and** range values in **Table 1** suggest? Justify your answer.

This image shows a full page of white paper with horizontal blue or grey ruling lines. The lines are evenly spaced and run across the width of the page, providing a template for handwriting practice or general note-taking. There are no margins, text, or other markings present.

1 6

The researcher found that the difference in results between the two groups was significant at $p < 0.01$

Explain what is meant by 'significant at $p < 0.01$ ' in the context of this study.

[3 marks]

1 7

The researcher used a different group of people in each condition, which could have affected the results.

Outline **one** change the researcher could have made to deal with this issue.

[2 marks]

1 8Explain **one or more** possible implications of the findings of this study for the economy.**[4 marks]**

Extra space
