Overview

Stride is a new offering from AQA which is designed to empower students and quickly identify and close their knowledge gaps in mathematics. Designed to help students starting their GCSEs – either for the first time or as a resit – the tests are accessible for all and adapt to students' knowledge, delivering the right amount of challenge.

Our new maths tests will allow teachers to pinpoint gaps in their students' conceptual knowledge - saving them time and empowering students, who will understand how to improve. They're fully funded for schools and colleges, easy to use for teachers and engaging for students.

The five short tests, created with the [Key Stage 1 and 2](#) and [Key Stage 3](#) guidance in mind, focus on key areas of maths that experts have identified as the most impactful for GCSE success. They come with personalised learning and next steps to allow students to develop in both knowledge and confidence.

Rationale

We know that maths is a hierarchical subject, with knowledge being built upon foundational maths which underpins the new concept. We have analysed data from hundreds of thousands of exam questions and found that even though content is first encountered in the early stages of a learner's schooling, a significant proportion of learners answer questions on the foundations of maths incorrectly.

With this in mind, we want to empower teachers to take control of their classrooms and provide a nurturing environment in which gaps within key prerequisite understanding are identified and corrective instruction is deployed, filling the gaps and ensuring that more complex content can be taught, safe in the knowledge that learners have the underlying knowledge required to be successful in their lessons, and thrive in the GCSE examinations.

Key features

The Concept Map on the following page shows that N1 Place Value is a key prerequisite in developing expertise and knowledge within Numbers, fundamental to success with rounding and estimation, equivalence between fractions, decimals and percentages, and multiplication and division by powers of ten.

It's also clear that N10 Factors and N11 Multiples are key to understanding many other areas of the mathematics curriculum, including prime factors and prime factor decomposition, equivalence and simplification of fractions, and square and cube numbers and their associated roots. Factors and multiples are successors of N5 Multiplication Tables, which is a key foundation for success in Numbers.

It is key that learners have not only developed fluency with these ideas, but have developed significant expertise with these building blocks, upon which success in GCSE mathematics is founded.

1. Numbers

N1 Place value

| | |
|--------------------------------|--|
| What is being tested | Learners are being tested on their understanding of the place value table, between millions and millionths. |
| Learning Objectives | <p>N1.1 Recognise place values for integers up to 1 000</p> <p>N1.2 Recognise place values for integers up to 1 000 000</p> <p>N1.3 Label the place value columns</p> <p>N1.4 Identify which column a given digit of a decimal number is in</p> <p>N1.5 Identify the place of numbers on the number line</p> <p>N1.6 Recognise place values for decimal numbers up to 6 d.p.</p> |
| Predecessors | None |
| Successors | <p>N2 Whole number bonds: addition/subtraction</p> <p>N16 Convert a decimal to/from a percentage</p> <p>N17 Convert a fraction to/from a decimal</p> <p>N29 Round to a given place value</p> <p>N30 Multiply/divide by 10, 100, 1000</p> |
| KS2 & KS3 Guidance | Learners begin their journey with place value with tens and ones in Year 2 (page 48, KS1 and KS2 guidance) and begin working with decimals in Year 5 (page 208, KS1 and KS2 guidance). |
| MathsWatch Platform References | <p>KS3 Clips: N1a, N1b, N2a, N2b</p> <p>GCSE Clips: 1</p> |

N2 Whole number bonds: addition/subtraction

| | |
|--------------------------------|---|
| What is being tested | Learners are being tested on their understanding of number bonds with addition and subtraction. |
| Learning Objectives | N2.1 Calculate integer number bonds up to two digits N2.2 Calculate integer number bonds up to three digits N2.3 Calculate integer number bonds with a mixed number of digits |
| Predecessors | N1 Place value |
| Successors | N7 Decimal number bonds: addition/subtraction |
| KS2 & KS3 Guidance | Learners begin to work with number bonds in Year 1 (page 17, KS1 and KS2 guidance) and work with addition and subtraction of whole numbers throughout their mathematical journey. |
| MathsWatch Platform References | KS3 Clips: N3a, N3b, N4a, N4b GCSE Clips: 17, 18 |

N3 Percentage as a number of parts per 100

| | |
|--------------------------------|--|
| What is being tested | Learners are being tested on their understanding of the use of the % sign and how this relates to fractional representations. |
| Learning Objectives | N3.1 Describe percentage N3.2 Recognise a visual representation of a percentage as parts per 100 N3.3 Calculate a fraction as a percentage when the denominator is 100 |
| Predecessors | None |
| Successors | N9 Finding simple percentages of an amount: 20%, 25%, 50% etc N16 Convert a decimal to/from a percentage N18 Convert a fraction to/from a percentage |
| KS2 & KS3 Guidance | Learners begin to understand percentages in Year 5 (page 208, KS1 and KS2 guidance) and continue to work with percentages through KS2 and KS3 (page 162, KS3 guidance). |
| MathsWatch Platform References | KS3 Clips: N24a GCSE Clips: 40 |

N4 Fractions as pictures

| | |
|--------------------------------|---|
| What is being tested | Learners are being tested on their ability to identify simple fractions from diagrams. |
| Learning Objectives | N4.1 Recognise the diagram that represents a given fraction N4.2 Identify equivalent fractions represented as bars |
| Predecessors | None |
| Successors | N8 Fraction facts |
| KS2 & KS3 Guidance | Learners begin to use fraction notation to describe parts of a whole in Year 3 (page 120, KS1 and KS2 guidance). |
| MathsWatch Platform References | KS3 Clips: N23a GCSE Clips: 24 |

N5 Multiplication tables

| | |
|--------------------------------|---|
| What is being tested | Learners are being tested on their understanding of multiplication facts and their ability to identify numbers as being in specified times tables. |
| Learning Objectives | N5.1 Complete a multiplication grid with missing numbers N5.2 Categorise numbers between 50 and 100 according to their appearance in the 6,7,8 or 9 times tables |
| Predecessors | None |
| Successors | N10 Factors N11 Multiples N21 Identify simple linear sequences |
| KS2 & KS3 Guidance | Learners begin work with the 2, 5 and 10 multiplication tables in Year 2 (page 69, KS1 and KS2 guidance), progressing throughout KS2. |
| MathsWatch Platform References | KS3 Clips: N5, N6 GCSE Clips: 19 |

N6 Finding percentages of an amount based on multiples of 5%

| | |
|--------------------------------|---|
| What is being tested | Learners are being tested on their ability to calculate 5%, and multiples of 5%, of a specified amount. |
| Learning Objectives | N6.1 Calculate 5% of a two-digit integer N6.2 Calculate 5% of a decimal up to two decimal places N6.3 Know that dividing 100% into twenty parts equals 5% |
| Predecessors | N9 Finding simple percentages of an amount: 20%, 25%, 50% etc |
| Successors | None |
| KS2 & KS3 Guidance | Learners work with percentage calculations beginning in KS3 (page 162, KS3 guidance). |
| MathsWatch Platform References | KS3 Clips: N24b GCSE Clips: 87 |

N7 Calculate decimal number bonds up to 1 d.p.

| | |
|--------------------------------|--|
| What is being tested | Learners are being tested on their understanding of number bonds with addition and subtraction of decimal numbers. |
| Learning Objectives | <p>N7.1 Calculate decimal number bonds up to 1 d.p.</p> <p>N7.2 Calculate decimal number bonds up to 2 d.p.</p> <p>N7.3 Calculate decimal number bonds up to 3 d.p.</p> <p>N7.4 Calculate decimal number bonds with a mixed number of decimal places</p> |
| Predecessors | N2 Whole number bonds: addition/subtraction |
| Successors | N19 Number bonds with a mix of fractions and decimals: addition/subtraction |
| KS2 & KS3 Guidance | Learners begin to add and subtract using decimals in Year 5 (page 216, KS1 and KS2 guidance). |
| MathsWatch Platform References | <p>KS3 Clips: N13b, N14b</p> <p>GCSE Clips: 17, 18</p> |

N8 Fraction facts

| | |
|--------------------------------|---|
| What is being tested | Learners are being tested on their understanding of the parts that form a fraction. |
| Learning Objectives | N8.1 Describe numerator N8.2 Describe denominator N8.3 Describe mixed fraction |
| Predecessors | N4 Fractions as pictures |
| Successors | N15 Equivalent fractions and simplifying |
| KS2 & KS3 Guidance | Learners begin to use fraction nomenclature to describe parts of a whole in Year 3 (page 120, KS1 and KS2 guidance), encountering mixed fractions in Year 4 (page 185, KS1 and KS2 guidance). |
| MathsWatch Platform References | KS3 Clips: N23b, N35 GCSE Clips: 24, 26b |

N9 Finding simple percentages of an amount; 20%, 25%, 50% etc

| | |
|--------------------------------|--|
| What is being tested | Learners are being tested on their ability to calculate a simple percentage of a specified amount. |
| Learning Objectives | <p>N9.1 Recognise how to find 50% of a number</p> <p>N9.2 Recognise how to find 25% of a number</p> <p>N9.3 Recognise how to find 20% of a number</p> <p>N9.4 Calculate 50% of a two-digit integer</p> <p>N9.5 Calculate 25% of a two-digit integer</p> <p>N9.6 Calculate 20% of a two-digit integer</p> |
| Predecessors | N3 Percentage as a number of parts per 100 |
| Successors | N6 Finding percentages of an amount based on multiples of 5% |
| KS2 & KS3 Guidance | Learners work with percentage calculations beginning in KS3 (page 162, KS3 guidance). |
| MathsWatch Platform References | <p>KS3 Clips: N24b</p> <p>GCSE Clips: 87</p> |

N10 Factors

| | |
|--------------------------------|--|
| What is being tested | Learners are being tested on their understanding of the term 'factor', and how this links to multiplication facts. |
| Learning Objectives | <p>N10.1 Identify the factors of a given number</p> <p>N10.2 Identify common factors of different numbers</p> <p>N10.3 Match different numbers to their factors</p> <p>N10.4 Define a factor</p> |
| Predecessors | N5 Multiplication tables |
| Successors | <p>N12 Prime numbers</p> <p>N13 Finding LCM/HCF</p> <p>N14 Prime factor decomposition</p> <p>N15 Equivalent fractions and simplifying</p> |
| KS2 & KS3 Guidance | Learners build on their understanding of multiplication facts by finding factors of specified numbers in Year 5 (page 245, KS1 and KS2 guidance). |
| MathsWatch Platform References | <p>KS3 Clips: N10</p> <p>GCSE Clips: 28</p> |

N11 Multiples

| | |
|--------------------------------|--|
| What is being tested | Learners are being tested on their ability to identify multiples of a specified number as the values in that number's times table. |
| Learning Objectives | N11.1 Define the times table of a number N11.2 Identify common multiples of different numbers |
| Predecessors | N5 Multiplication tables |
| Successors | N13 Finding LCM/HCF N22 Square/cube numbers N24 Nth terms – linear sequence ($an + b$) |
| KS2 & KS3 Guidance | Learners are introduced to the idea of multiples in Year 1 (page 26, KS1 and KS2 guidance) and extend upon this idea throughout Key Stages 1 and 2, identifying multiples of specified numbers in Year 5 (page 244, KS1 and KS2 guidance). |
| MathsWatch Platform References | KS3 Clips: N11 GCSE Clips: 28 |

N12 Prime numbers

| | |
|--------------------------------|--|
| What is being tested | Learners are being tested on their understanding of the term 'prime number' and their ability to identify prime numbers. |
| Learning Objectives | N12.1 Define a prime number N12.2 Know the prime numbers up to thirty N12.3 Recognise prime numbers up to 50 |
| Predecessors | N10 Factors |
| Successors | N14 Prime factor decomposition |
| KS2 & KS3 Guidance | Learners encounter prime numbers in Year 5 (page 246, KS1 and KS2 guidance), identifying primes up to 100. |
| MathsWatch Platform References | KS3 Clips: N30a GCSE Clips: 28 |

N13 Finding LCM/HCF

| | |
|--------------------------------|--|
| What is being tested | Learners are being tested on their understanding of common factors and multiples, calculating the Lowest Common Multiple and the Highest Common Factor. |
| Learning Objectives | <p>N13.1 Recognise the highest common factor from a list of multiples and factors</p> <p>N13.2 Recognise the lowest common multiples from a list of multiples and factors</p> <p>N13.3 Calculate the highest common factor of two positive integers from a Venn diagram</p> <p>N13.4 Calculate the lowest common multiple of two positive integers from a Venn diagram</p> <p>N13.5 Identify common factors of two positive integers using prime factor decomposition by completing a Venn diagram</p> |
| Predecessors | <p>N10 Factors</p> <p>N11 Multiples</p> <p>N14 Prime factor decomposition</p> |
| Successors | N15 Equivalent fractions and simplifying |
| KS2 & KS3 Guidance | Learners are introduced to the idea of common factors and common multiples in Year 5 (page 245, KS1 and KS2 guidance) and make the connection to prime numbers in Year 7 (page 30, KS3 guidance). |
| MathsWatch Platform References | <p>KS3 Clips: N31a, N31b, N30b</p> <p>GCSE Clips: 79, 80</p> |

N14 Prime factor decomposition

| | |
|--------------------------------|--|
| What is being tested | Learners are being tested on their ability to write composite numbers as a multiplication of prime numbers. |
| Learning Objectives | <p>N14.1 Identify the prime factors of a positive integer</p> <p>N14.2 Identify the prime factor decomposition of a given positive integer</p> <p>N14.3 Show the prime factor decomposition of a positive integer using index form where appropriate</p> |
| Predecessors | <p>N10 Factors</p> <p>N12 Prime numbers</p> |
| Successors | N13 Finding LCM/HCF |
| KS2 & KS3 Guidance | Learners are introduced to prime factorisation in Year 7 (page 30, KS3 guidance). |
| MathsWatch Platform References | <p>KS3 Clips: N30b</p> <p>GCSE Clips: 78</p> |

N15 Equivalent fractions and simplifying

| | |
|--------------------------------|--|
| What is being tested | Learners are being tested on their ability to identify and use equivalence between fractions, and to write a fraction in its simplest form. |
| Learning Objectives | <p>N15.1 Write a fraction in its simplest form (lowest term)</p> <p>N15.2 Calculate missing numerators using equivalent fractions</p> <p>N15.3 Calculate missing denominators using equivalent fractions</p> <p>N15.4 Match equivalent fractions</p> |
| Predecessors | <p>N8 Fraction facts</p> <p>N10 Factors</p> <p>N11 Multiples</p> |
| Successors | <p>N17 Convert a fraction to/from a decimal</p> <p>N18 Convert a fraction to/from a percentage</p> <p>N25 Addition and subtraction of fractions with a common denominator</p> <p>N26 Multiplication of fractions</p> |
| KS2 & KS3 Guidance | Learners work with equivalent fractions in Year 5 (page 258, KS1 and KS2 guidance), simplifying fractions in Year 6 (page 312, KS3 guidance). |
| MathsWatch Platform References | <p>KS3 Clips: N23b, N23c</p> <p>GCSE Clips: 25, 26a</p> |

N16 Convert a decimal to/from a percentage

| | |
|--------------------------------|--|
| What is being tested | Learners are being tested on their ability to convert between percentage and decimal representations of a number. |
| Learning Objectives | N16.1 Recognise the correct equivalence of a percentage as a decimal N16.2 Order decimals and percentages N16.3 Recognise a decimal as its equivalent percentage |
| Predecessors | N1 Place value N3 Percentage as a number of parts per 100 |
| Successors | N20 Calculations with fractions, decimals and percentages |
| KS2 & KS3 Guidance | Learners begin to appreciate hundredths in Year 5 (page 212, KS1 and KS2 guidance), building on this in upper KS2 before KS3 study (page 81, KS3 guidance). |
| MathsWatch Platform References | KS3 Clips: N32 GCSE Clips: 85 |

N17 Convert a fraction to/from a decimal

| | |
|--------------------------------|---|
| What is being tested | Learners are being tested on their ability to convert between fractional and decimal representations of a number. |
| Learning Objectives | <p>N17.1 Match decimals and equivalent fractions</p> <p>N17.2 Order fractions and decimals</p> <p>N17.3 Find the equivalent fraction from a decimal (hundredths)</p> <p>N17.4 Find the equivalent decimal from a fraction (hundredths)</p> <p>N17.5 Match fractions to equivalent decimals (non-standard)</p> <p>N17.6 Convert a fraction to a decimal using division</p> |
| Predecessors | <p>N1 Place value</p> <p>N15 Equivalent fractions and simplifying</p> |
| Successors | <p>N19 Number bonds with a mix of fractions and decimals: addition/subtraction</p> <p>N20 Calculations with fractions, decimals and percentages</p> |
| KS2 & KS3 Guidance | Learners recall decimal equivalents for common fractions in Year 5 (page 262, KS1 and KS2 guidance). |
| MathsWatch Platform References | <p>KS3 Clips: N32</p> <p>GCSE Clips: 84</p> |

N18 Convert a fraction to/from a percentage

| | |
|--------------------------------|---|
| What is being tested | Learners are being tested on their ability to convert between percentage and fractional representations of a number. |
| Learning Objectives | <p>N18.1 Recognise the correct equivalence of a percentage as a fraction out of 100</p> <p>N18.2 Calculate a fraction as a percentage when the denominator is a factor of 100</p> <p>N18.3 Match percentages to their equivalent fractions</p> <p>N18.4 Identify the calculation to convert a real-world fraction to a percentage</p> <p>N18.5 Find the equivalent fraction from a percentage containing a decimal</p> <p>N18.6 Match fractions to equivalent percentages</p> |
| Predecessors | <p>N3 Percentage as a number of parts per 100</p> <p>N15 Equivalent fractions and simplifying</p> |
| Successors | N20 Calculations with fractions, decimals and percentages |
| KS2 & KS3 Guidance | Learners begin to appreciate hundredths in Year 5 (page 212, KS1 and KS2 guidance), building on this in upper KS2 before KS3 study (page 81, KS3 guidance). |
| MathsWatch Platform References | <p>KS3 Clips: N32</p> <p>GCSE Clips: 85</p> |

N19 Number bonds with a mix of fractions and decimals: addition/subtraction

| | |
|--------------------------------|---|
| What is being tested | Learners are being tested on their understanding of number bonds with addition and subtraction of a combination of fractional and decimal representations of numbers. |
| Learning Objectives | N19.1 Calculate mixed number bonds involving whole numbers and decimals |
| Predecessors | N7 Decimal number bonds: addition/subtraction N17 Convert a fraction to/from a decimal |
| Successors | None |
| KS2 & KS3 Guidance | Learners begin to appreciate fraction/decimal equivalence in Year 7 (page 80, KS3 guidance). |
| MathsWatch Platform References | KS3 Clips: N36 GCSE Clips: 17 |

N20 Calculations with fractions, decimals and percentages

| | |
|--------------------------------|---|
| What is being tested | Learners are being tested on their ability to convert between percentage, decimal and fractional representations of a specified number, extending this knowledge to identify the best value in a specified context. |
| Learning Objectives | <p>N20.1 Order a mixture of fractions, percentages, and decimals</p> <p>N20.2 Order sale offers that are in a mixture of fractions, percentages and decimals</p> <p>N20.3 Recognise 'best buys' by using the equivalence of fractions, percentages and decimals</p> |
| Predecessors | <p>N16 Convert a decimal to/from a percentage</p> <p>N17 Convert a fraction to/from a decimal</p> <p>N18 Convert a fraction to/from a percentage</p> |
| Successors | None |
| KS2 & KS3 Guidance | Learners use fractions, decimals and percentages interchangeably in Year 8 (page 160, KS3 guidance). |
| MathsWatch Platform References | <p>KS3 Clips: N32, N34</p> <p>GCSE Clips: 70, 85</p> |

N21 Identify simple linear sequences

| | |
|--------------------------------|--|
| What is being tested | Learners are being tested on their ability to extend simple linear sequences. |
| Learning Objectives | N21.1 Identify next term in a sequence of diagrams N21.2 Match positive number sequences with their term-to-term rule N21.3 Identify next term in a simple linear sequence |
| Predecessors | N5 Multiplication tables |
| Successors | N24 Nth terms – linear sequence ($an + b$) |
| KS2 & KS3 Guidance | Learners begin working with sequences in Year 1 (page 18, KS1 and KS2 guidance) and continue this work through KS1 and KS2. |
| MathsWatch Platform References | KS3 Clips: N12, A11a GCSE Clips: 37 |

N22 Square/cube numbers

| | |
|--------------------------------|--|
| What is being tested | Learners are being tested on their ability to identify square and cube numbers, using correct definitions and terminology. |
| Learning Objectives | <p>N22.1 Identify square numbers up to 100</p> <p>N22.2 Identify cube numbers up to 100</p> <p>N22.3 Define square number</p> <p>N22.4 Define cube number</p> <p>N22.5 Show numbers using index notation e.g. $16 = 4 \times 4 = 4^2$</p> |
| Predecessors | N11 Multiples |
| Successors | N23 Square roots and cube roots |
| KS2 & KS3 Guidance | Pupils work with square and cube numbers in upper KS2 (page 30, KS3 guidance) and extend upon this knowledge in Year 7 (page 30, KS3 guidance). |
| MathsWatch Platform References | <p>KS3 Clips: N25</p> <p>GCSE Clips: 81</p> |

N23 Square roots and cube roots

| | |
|--------------------------------|--|
| What is being tested | Learners are being tested on their understanding of square and cube numbers, working inversely to find roots, using correct definitions and terminology. |
| Learning Objectives | <p>N23.1 Define square root</p> <p>N23.2 Define cube root</p> <p>N23.3 Recall that taking the square root is the inverse of squaring</p> <p>N23.4 Recall that that taking the cube root is the inverse of cubing</p> <p>N23.5 Identify the square root of x^2</p> <p>N23.6 Identify the cube root of x^3</p> |
| Predecessors | N22 Square/cube numbers |
| Successors | None |
| KS2 & KS3 Guidance | Pupils work with square and cube roots in Year 7 (page 30, KS3 guidance). |
| MathsWatch Platform References | <p>KS3 Clips: N25</p> <p>GCSE Clips: 81</p> |

N24 Nth term: Linear sequence ($an + b$)

| | |
|--------------------------------|---|
| What is being tested | Learners are being tested on their ability to describe an arithmetic sequence using an algebraic position-to-term rule. |
| Learning Objectives | <p>N24.1 Identify linear sequences</p> <p>N24.2 Find first terms of a linear sequence given the nth term</p> <p>N24.3 Match the sequences with their nth term rule</p> <p>N24.4 Identify the nth term of a list of multiples</p> <p>N24.5 Find the first four terms of a sequence given in the form $an + b$</p> <p>N24.6 Write the general term for the multiples of a number</p> |
| Predecessors | <p>N11 Multiples</p> <p>N21 Identify simple linear sequences</p> |
| Successors | None |
| KS2 & KS3 Guidance | Learners begin using the nth term to describe a sequence in Year 8 (page 129, KS3 guidance). |
| MathsWatch Platform References | <p>KS3 Clips: A11b, A11c</p> <p>GCSE Clips: 102, 103</p> |

N25 Addition and subtraction of fractions with a common denominator

| | |
|--------------------------------|--|
| What is being tested | Learners are being tested on their ability to add and subtract fractions which are written in the same denominator. |
| Learning Objectives | <p>N25.1 Recognise the correct addition of common fractions with the same denominator</p> <p>N25.2 Calculate the addition of mixed fractions with the same denominator</p> <p>N25.3 Recognise non-unit fractions as repeated addition of unit fractions</p> <p>N25.4 Calculate the subtraction of mixed fractions with the same denominator</p> <p>N25.5 Calculate common fraction bonds involving addition</p> <p>N25.6 Calculate common fraction bonds involving subtraction</p> |
| Predecessors | N15 Equivalent fractions and simplifying |
| Successors | N27 Addition and subtraction of fractions (without a common denominator) |
| KS2 & KS3 Guidance | Learners add and subtract fractions written in the same unit in Year 4 (page 188, KS1 and KS2 guidance). |
| MathsWatch Platform References | <p>KS3 Clips: N36</p> <p>GCSE Clips: 71</p> |

N26 Multiplication of fractions

| | |
|--------------------------------|--|
| What is being tested | Learners are being tested on their ability to multiply using fractions. |
| Learning Objectives | <p>N26.1 Calculate non-unit fractions of an amount</p> <p>N26.2 Select the correct calculation to find a common fraction of an amount</p> <p>N26.3 Recognise the product of two fractions</p> <p>N26.4 Find the product of two fractions (no simplification)</p> <p>N26.5 Find the product of two fractions (with simplification)</p> <p>N26.6 Find the product of three fractions (no simplification)</p> |
| Predecessors | N15 Equivalent fractions and simplifying |
| Successors | N28 Division of fractions |
| KS2 & KS3 Guidance | Learners encounter multiplication of fractions in Year 7 (page 85, KS3 guidance). |
| MathsWatch Platform References | <p>KS3 Clips: N37a, N42a</p> <p>GCSE Clips: 73</p> |

N27 Addition and subtraction of fractions (without a common denominator)

| | |
|--------------------------------|---|
| What is being tested | Learners are being tested on their ability to add and subtract fractions which are written in different denominators, drawing on their understanding of equivalent fractions. |
| Learning Objectives | <p>N27.1 Recognise the method for the sum of two fractions</p> <p>N27.2 Match fractions to their common denominators</p> <p>N27.3 Recognise the difference of two fractions</p> <p>N27.4 Find the difference of two fractions (no simplification)</p> <p>N27.5 Find the sum of two fractions (with simplification to a mixed number)</p> <p>N27.6 Find the difference of two mixed number fractions</p> |
| Predecessors | N25 Addition and subtraction of fractions with a common denominator |
| Successors | None |
| KS2 & KS3 Guidance | Learners begin to add and subtract fractions written in different units in upper KS2 and continue to work on this in Year 7 (page 84, KS3 guidance). |
| MathsWatch Platform References | <p>KS3 Clips: N41</p> <p>GCSE Clips: 71</p> |

N28 Division of fractions

| | |
|--------------------------------|--|
| What is being tested | Learners are being tested on their ability to divide using fractions. |
| Learning Objectives | <p>N28.1 Recognise the method for the division of fractions</p> <p>N28.2 Recognise the quotient of two fractions</p> <p>N28.3 Find the quotient of two fractions (no simplification)</p> <p>N28.4 Find the quotient of two fractions (with simplification to a mixed number)</p> |
| Predecessors | N26 Multiplication of fractions |
| Successors | None |
| KS2 & KS3 Guidance | Learners encounter division of fractions in Year 7 (page 85, KS3 guidance). |
| MathsWatch Platform References | <p>KS3 Clips: N37b, N42b</p> <p>GCSE Clips: 74</p> |

N29 Round to a given place value

| | |
|--------------------------------|---|
| What is being tested | Learners are being tested on their understanding of rounding to the nearest multiple of powers of 10, and to the nearest whole number. |
| Learning Objectives | N29.1 Round to the nearest whole number N29.2 Round to the nearest 10 N29.3 Round to the nearest 100 N29.4 Round to the nearest 1000 |
| Predecessors | N1 Place value |
| Successors | N31 Round to a given decimal place |
| KS2 & KS3 Guidance | Learners begin to round specified values in Year 4 (page 150, KS1 and KS2 guidance). |
| MathsWatch Platform References | KS3 Clips: N27a GCSE Clips: 31 |

N30 Multiply/divide by 10, 100, 1000

| | |
|--------------------------------|--|
| What is being tested | Learners are being tested on their ability to multiply and divide by 10, 100 and 1000 drawing on their understanding of the place value. |
| Learning Objectives | N30.1 Recognise the effect of multiplying by 100 or 1000 N30.2 Recognise the effect of dividing by 100 or 1000 N30.3 Identify the product when multiplying a given number by 1000 N30.4 Identify the quotient when dividing a given number by 100 N30.5 Calculate the multiplication of decimal numbers by 10, 100, 1000 N30.6 Calculate the division of decimal numbers by 10, 100, 1000 |
| Predecessors | N1 Place value |
| Successors | N32 Multiplying and dividing by powers of 10 |
| KS2 & KS3 Guidance | Learners begin to multiply and divide by 10 and 100 in Year 4 (page 170, KS1 and KS2 guidance). |
| MathsWatch Platform References | KS3 Clips: N17a, N17b GCSE Clips: 30 |

N31 Round to a given decimal place

| | |
|--------------------------------|---|
| What is being tested | Learners are being tested on their ability to round decimals to a specified number of decimal places. |
| Learning Objectives | N31.1 Round to one decimal place N31.2 Round to two decimal places N31.3 Round to three decimal places |
| Predecessors | N29 Round to a given place value |
| Successors | N33 Round to significant figures |
| KS2 & KS3 Guidance | Learners begin to round to a specified number of decimal places in Year 6 (page 289, KS1 and KS2 guidance) and continue this work in Year 8 (page 122, KS3 guidance). |
| MathsWatch Platform References | KS3 Clips: N27b GCSE Clips: 32 |

N32 Multiplying and dividing by powers of 10

| | |
|--------------------------------|---|
| What is being tested | Learners are being tested on their ability to multiply and divide by powers of 10, recognising that multiplication and division are inverses. |
| Learning Objectives | N32.1 Identify the product of multiplying a given number by a power of 10 (>0 , in index form) N32.2 Identify the quotient when dividing a given number by a power of 10 (>0 , power in index form) N32.3 Recognise that the division with negative powers of 10 is equivalent to multiplication with positive powers of 10 |
| Predecessors | N30 Multiply/divide by 10, 100, 1000 |
| Successors | N34 Simple standard form |
| KS2 & KS3 Guidance | Learners continue to multiply and divide by powers of ten in Year 7 (page 26, KS3 guidance). |
| MathsWatch Platform References | KS3 Clips: N17a, N17b GCSE Clips: 30 |

N33 Round to significant figures

| | |
|--------------------------------|---|
| What is being tested | Learners are being tested on their understanding of rounding to significant figures, drawing on their understanding of rounding to the nearest power of 10. |
| Learning Objectives | N33.1 Round to one significant figure N33.2 Round to two significant figures N33.3 Round to three significant figures |
| Predecessors | N31 Round to a given decimal place |
| Successors | N35 Approximation |
| KS2 & KS3 Guidance | Learners begin to round to a specified number of significant figures in Year 8 (page 121, KS3 guidance). |
| MathsWatch Platform References | KS3 Clips: N38 GCSE Clips: 90 |

N34 Simple standard form

| | |
|--------------------------------|--|
| What is being tested | Learners are being tested on their understanding of the use of standard form to represent large numbers. |
| Learning Objectives | N34.1 Convert numbers in simple standard form $A \times 10^n$ (positive value of A and positive integer value of n) into an ordinary number N34.2 Convert ordinary numbers into simple standard form $A \times 10^n$ (positive value of A and positive integer value of n) N34.3 Identify the simple standard form of a number $A \times 10^n$ |
| Predecessors | N32 Multiplying and dividing by powers of 10 |
| Successors | None |
| KS2 & KS3 Guidance | Learners encounter the idea of 'standard index form' in Year 7 and extend on this idea in Year 9 (page 253, KS3 guidance). |
| MathsWatch Platform References | KS3 Clips: N45a GCSE Clips: 83 |

N35 Approximation

| | |
|--------------------------------|---|
| What is being tested | Learners are being tested on their ability to approximate a calculation, drawing on their understanding of rounding to significant figures. |
| Learning Objectives | <p>N35.1 Estimate integer number bonds of any size by using rounding</p> <p>N35.2 Recognise the appropriate rounded number by rounding to the nearest 10, 100, 1000</p> <p>N35.3 Recognise the appropriate rounded number by rounding to a specified decimal place</p> <p>N35.4 Recognise the appropriate rounded number by rounding to a specified significant figure</p> <p>N35.5 Estimate decimal number bonds of any size by using rounding</p> |
| Predecessors | N33 Round to significant figures |
| Successors | None |
| KS2 & KS3 Guidance | Learners build on their understanding of rounding, estimating calculations in Year 8 (page 121, KS3 guidance). |
| MathsWatch Platform References | <p>KS3 Clips: N43a, N43b</p> <p>GCSE Clips: 91</p> |

Contributors

AQA

We're an independent education charity, providing high quality assessments that are fair, reliable, and support students in their educational journey.

Our qualifications expertise dates back to 1903, when our predecessor boards were founded by five leading universities. Today, we're the largest provider of academic qualifications taught in schools and colleges.

We set and mark the papers for over half of all GCSEs and A-levels taken every year. But exams are only part of the story – we also make sure the content of our qualifications support great teaching.

Our qualifications are designed to suit a range of abilities and include GCSEs, AS and A-levels, the Extended Project Qualification and Technical Awards. Our qualifications are internationally recognised and taught in more than 40 countries around the world and they're highly valued by employers and universities.

We're led by our Executive Team and governed by a Board of Trustees drawn from schools, colleges, higher education, children's services and the business community.

MathsWatch

MathsWatch is a complete solution that supports teachers' delivery of the Maths curriculum while reducing their workload.

We provide teachers and their students with high-quality videos covering every Maths topic, combined with banks of interactive questions that can be used for classwork/homework/assessment/independent learning. Our innovative marking algorithms have revolutionised the way teachers can deliver quality Maths lessons to their students as we are the only platform worldwide able to give marks for working out and not merely for final answers. This revolutionary feature makes the MathsWatch experience much more realistic and beneficial to students than most traditional quiz setting platforms.

Furthermore, our popular modelled exam series offer the best possible preparation to students before their final GCSE exams. They can see their grade progression as they advance and clearly identify their strengths and areas of development. A truly immersive experience.

All this is offered to schools by MathsWatch at one of the most competitive price points currently on the market.

Please visit www.mathswatch.co.uk for more information on our subscription packages.
